

We invite you to an important local event:

Brainstorming Bertra

International experts are coming to Murrisk to share ideas on how places around Europe are tackling local climate issues. Ongoing coastal erosion and flooding, planning and local jobs into the future are just some of the issues that have been identified in the broader Bertra area.

Prof Enzo Pranzini

(University of Florence)

Prof Bas Pedroli

(Wageningen University)

Dr Maura Farrell

(NUI Galway)

This **Free** event is open to everyone. There will be **four 5-minute talks** by the visiting speakers, with plenty of time for questions. This will be followed by a chance to chat with the experts. There will also be an opportunity to join a group who'd like to **kickstart local climate action**.
